

Steps

Before starting this Lab, verify that you have installed VirtualBox properly using the instructions in LAB 1

After reviewing the resources for this assignment, do the following steps...

1: Start a Word document, making sure you start with your name, the assignment name and the due date.

2: Following the instructions, install Windows 10 in your VirtualBox installation.

- Once Windows is installed, take a screenshot of the desktop in the VirtualBox.
- Insert the screenshot into the Word document

3: Choose one of the following Linux Desktop Distributions: Ubuntu, Debian, Fedora, Puppy Linux, or Mint Linux. The installation instructions and download pages are listed in the resources.

- Following the appropriate instructions, install the chosen Linux Distribution on the VirtualBox.
- Once the installation is completed, take a screenshot of the desktop in the VirtualBox.
- Enter the Distribution Name and Version number in the Word Document. Insert the screenshot of the desktop in the document.
