

Steps

After reviewing the resources for this assignment, do the following steps...

1: Start a Word document, making sure you start with your name, the assignment name and the due date.

2: Download the iRedMail basic installation from their website, and following the instructions, install the email server on your Ubuntu VirtualBox installation.

- Once installed, take a screenshot of an administrative screen for the system and insert it into the Word Document.

3: On your Windows 2022 VirtualBox installation, activate Internet Information Service (IIS) following the instructions.

- Once it is activated, take a screenshot of the IIS control panel/administrative screen and insert it into the Word document.
- Open a web browser in the VirtualBox, and go to the address 127.0.0.1
- Take a screenshot of the resultant webpage, which should be an IIS welcome page. Insert the screenshot into the Word document.
