

DAVID HAZALL-FARRELL

Cybersecurity Analyst | Penetration Testing • Security Operations • Systems Administration

North Haven, CT 06473 | (203) 745-5869 | hazalldr22@bonaventure.edu
davidrhf.github.io | github.com/DavidRHF | linkedin.com/in/YOUR-HANDLE

PROFESSIONAL SUMMARY

Computer Science B.S. graduate and incoming Cybersecurity M.S. student with internship experience in red team penetration testing and security operations. Skilled in Wazuh SIEM deployment and log analysis, host-based intrusion detection, TCP/UDP network monitoring, Linux and Windows server administration, and scripting in Python and Bash. Seeking an entry-level Cybersecurity Analyst, SOC Analyst, or IT Security role. Open to relocation.

TECHNICAL SKILLS

Security & Offensive: Penetration Testing, Red Team Operations, Ethical Hacking, Vulnerability Assessment, Payload Development, Hak5 Bash Bunny Mark II, DuckyScript

Security Operations: Wazuh SIEM, Host-Based Intrusion Detection (HIDS), Log Analysis, Alert Triage, Threat Detection, Incident Response, Network Traffic Monitoring, Packet Analysis

Programming & Scripting: Python, Bash, C#, SQL, PowerShell, HTML, JSON, XML

Systems & Networking: Linux (Ubuntu), Windows Server, Apache2, IIS Manager, TCP/IP, UDP, DNS, Web Server Administration, Virtualization

Cloud & Data: AWS, Cloud Security Fundamentals, SQL Database Administration, Query Optimization, Git and GitHub

PROFESSIONAL EXPERIENCE

Red Team Security Intern — St. Bonaventure University

St. Bonaventure, NY | January 2026 – May 2026

- Conducted authorized penetration testing against university lab systems using a Hak5 Bash Bunny Mark II, developing custom keystroke-injection payloads in DuckyScript and Bash.
- Monitored system and network logs to trace attack paths, validate detection coverage, and document indicators of compromise.
- Reported vulnerabilities and remediation recommendations to faculty supervisors, connecting offensive findings to defensive hardening.

Systems & Security Engineering Intern — St. Bonaventure University

St. Bonaventure, NY | September 2025 – December 2025

- Reconfigured university systems using JSON and XML configuration files and deployed Wazuh agents for host-based intrusion detection and centralized log collection.
- Built out the university cybersecurity lab from hardware installation through network configuration and software provisioning, supporting hands-on security coursework.
- Authored setup and configuration documentation so future students and staff could reproduce the lab environment.

Ship Dock Associate / IT Support — Amazon

North Haven, CT | June 2025 – September 2025

- Troubleshoot handheld scanners, workstation hardware, and network connectivity issues to minimize downtime during high-volume shifts.
- Loaded and staged outbound freight in a deadline-driven, safety-regulated warehouse environment.

Sales Associate — Hobby Lobby

Olean, NY | October 2024 – Present

- Supported customers at the register and on the floor while carrying a full academic course load.

EDUCATION

Bachelor of Science, Computer Science — St. Bonaventure University

St. Bonaventure, NY | September 2022 – May 2026

- Relevant coursework: Operating Systems, Databases, Computer Networks, Computer Architecture, Web Development.
- SQL database administration; Linux web hosting with Apache2; TCP and UDP traffic monitoring.

Summer Study Abroad Program — Trinity College, University of Oxford

Oxford, England | June 2024 – August 2024

- Completed academic coursework in an international cohort.

CERTIFICATIONS & ACHIEVEMENTS

- CompTIA Security+ (in progress) | Future Problem Solvers: 1st Place, State | Languages: English (native), Spanish (basic)
